SEEDS

47.0°

E. W. REID, Bridgeport, Ohio.

IMPORTANT TO BUYERS.

When Ordering, do not forget to sign with order plainly, and give your full address, no difference how often you write us.

How to Send Money.—Any amount less than \$1 can be sent in two-cent postage stamps; for sums over this amount send post-office or express money order, bank draft, or registered letter. Do not remit by private checks unless adding 25c. to make collection.

Postpaid by Mail.—We pay the postage on all seeds as follows: Packets, ounce, $\frac{1}{2}$ -pound, pound, pint and quart. When over this amount is wanted, add 8 cents per pound, if to be sent by mail; otherwise we will send by express or freight.

THE STONE—THE NEW TOMATO.

The New "Stone" Tomato ripens for main crop; is very large, and of bright scarlet color; very smooth, with occasionally a specimen very slightly octagon-shaped, ripening evenly to the stem without a crack; exceedingly solid and firm-fleshed (as its name indicates); is an excellent shipper; quality the very best; fine for canning; a good keeper; without hard core; not subject to rot; its appearance on market remarkably attractive;

a heavy variety, its vines and foliage rank and robust, heavily loaded with uniform specimens of fruit.

For five years this tomato has been subjected to the most careful testing, and we have found it to possess several superior qualities and distinct characteristics. We believe it to be the coming tomato for market-gardeners and can ners.

ABOVE ALL, NOT SUBJECT TO ROT.—Prof. J. L. Budd, of I Iowa State Agricultural College, says: "The tomato-seed was planted in my private garden, and the fruit compared with many sorts at the Experiment Plantations. It was large enough, smooth, firmfleshed, and above all, not subject to rot. I did not see a rotten specimen, although it was a bad year for rot." 10 cts. per pkt., two pkts., 15 cts.; 30 cts. per oz.

LIVINGSTON'S GOLD-COIN SWEET-CORN.

Remarkably distinct and handsome in appearance, in these respects exciting the ad-

miration, not only of gardeners, but of professional seed-growers, and is without doubt the most valuable variety ever introduced. Its enormous productiveness is enough to place it in advance of any sort now grown; it almost always yields two and frequently three mammoth ears to the stalk. 10 cts. per pkt., 25 cts. per pt., 45 cts. per qt.

THE NEW GRAGG WATER-MELON.

From the northern part of Texas and is justly famous in its native home; but how it originated is unknown. Some three or four years since, a customer in that state sent us a few seeds for trial. Unfortunately the correspondence has been mislaid, and hence we are unable to give credit. We have had it tested in the north, south and west, and not a single unfavorable report. 10 cts. per pkt., 20 cts. per oz., 85 cts. per 1/4-lb., \$3 per lb.

IMPROVED CHARTIER RADISH.

This is an early summer variety. In color a deep pink or crimson above, and gradually blends into a pure waxy white to its roots, making it very attractive in appearance. In quality it is unsurpassed, being very tender and remaining so for a longer period than most other summer radishes after attaining its growth. It is especially adapted for market-gardeners. 5 cts. per pkt., 10 cts. per oz., 20 cts. per ¼-1b., 65 cts. per lb.

DWARF CHAMPION TOMATO.

One of the most distinct and valuable tomatoes of recent introduction; dwarf and compact growth, growing stiff and upright, with thick-jointed stems, and foliage unlike any other. In form, color and size, the tomatoes resemble the Acme-very smooth and symmetrical in shape, ripening close around the stem. It matures the fruit ready to market as early as July 1. It is very productive, many stalks having the fruit crowded closely together on the branches for the length of fifteen inches. 5 cts. per pkt., 30 cts. per oz., 90 cts. per 14-lb., \$3 per lb.

LIVINGSTON'S NEW BEAUTY TOMATO.

The color is quite distinct from any other sort, being a very glossy crimson, with a slight tinge of purple; the color alone will bring it into favor. It grows in clusters of four or five large fruits, retaining its large size late in the season. This is an essential point in its favor, as many other good sorts decrease in size at least one-half before the season is over. It ripens with the Acme

and Perfection, is entirely free from ribbed and elongated fruit, being perfect in shape. During the past four seasons of growth, under varied circumstances and on different classes of soil, it showed no signs of rotting. This is partly signs of rotting. on account of its firmness, besides its having a thick skin and few seeds. 10 cts. per pkt., 20 cts. per ½-oz., 35 cts. per oz., \$1 per ¼-lb., \$3 per lb.

SENECA FALLS, ILL. Plants came up all right, I am well pleased with them.

M. B. MORLAN. ATLANTA, ILL.

My order (No. 3302) arrived in good condition and gave the best of satisfaction. Thanks to you.

J. S. DONDY.

LIVERPOOL, PA. Shipment of stock received, everything as ordered. Please receive our thanks for same.
A. F. UNCAPHER.

Dwarf Champion Tomato.

NEW EARLY HACKENSACK MELON.

By careful selection and improvement, carried on for some years, this strain has been so developed that it produces melons with all the good qualities of the well-known Hackensack melon, but at least ten days earlier. melons weigh from six to ten pounds each, are of a nutmeg shape, heavily netted, and have light green flesh of delicious flavor. This is the third year that we have sold this Extra-Early Hackensack melon, and have not had a complaint. We grew it largely for seed last season, and had opportunities to observe its earliness, manner of growth, etc. 5 cts. per pkt., 10 cts. per oz., 25 cts. per ¼-lb., 90 cts. per lb.

New Early Hackensack Melon.

HENDERSON'S EARLY SNOWBALL CAULIFLOWER.

Everything considered, this is certainly the best type of cauliflower in the market.

The experience of years shows it to be unexcelled by any variety for earliness. If planted March I, large-sized heads will be produced early in June, about one week earlier than other varieties, and scarcely a single head will fail to form. The outer leaves are short, so that the plants may be set from eighteen to twenty inches apart, thus allowing the planting of from twelve to fourteen thousand heads per acre. Its compact habit of growth renders it a peculiarly profitable variety to force under glass. and it does equally well, also, for late planting. 15 cts. per pkt., \$1 per \(\frac{1}{4}\)-oz., 3**\$ per** 1b.

NEW JAPANESE BUCKWHEAT.

The Japanese buckwheat is entirely distinct from all other varieties; the kernels are at least double the size of those of any other variety, and of a shape peculiar and distinct from all others. The color of the kernel is also distinct, being a rich, dark shade of brown. Henderson's Early Snowball Cauliflower, straw is heavier and branches more. It does

not need to be sown as thickly as the other

The flour made from it is equal in quality to that of any other buckwheat. enormously productive. On account of its earliness it can be grown farther north than any other. 10 cts. per pkt., 25 cts. per lb.; by express or freight, 15 cts. per qt., 60 cts. per pk.,

\$1.75 per bus.

FLEMING, N. Y.

The remainder of order No. 3255 received in good condition, for which accept my thanks. R. E. PAUL.

OAKLAND, N. Y.

Plants (No. 3023) arrived in good condition. Thanks for promptness and extras. LUTHER R. THOMPSON.

SUMMERFIELD, KANSAS. The plants by mail came all right and are the finest I ever saw sent by mail. I am well pleased with your manner of dealing. A. C. Cornish.

WEST MIDDLETON, IND.

The plants arrived in good condition; they are the best-rooted plants I ever saw. JACOB GARRISON.
